

Meet the upgradable FELIX Pro 3

Dual extrusion system  
Retractable printhead allows  
consistent and reliable dual  
head printing

Full metal  
print-heads  
Swap out a print-head  
in seconds. Exchange  
nozzle sizes and print-  
heads dedicated to  
specific materials.

Automatic calibration  
Ensures first layer filament  
adhesion to the bed, resulting in  
consistent print accuracy

Convenient  
flex plate  
Easy object removal

Touchscreen  
Smart, responsive  
interface

FELIXprinters values

- Robust and reliable design**

*Easily print jobs of up to 70 hours or more  
and kilometers of filament*
- Craftsmanship**

*Industrial grade materials ensure  
long term reliable operation.*
- Superior technology driving real value**

*Focus less on the machine and more on your result*
- Upgradability**

*Fully upgradable design*
- Lifetime support**

*Targeted service to enable your success*

Machine specifications

Build size	235 x 244 x 235 mm	9.25 x 9.6 x 9.25 inch
Build volume	13.5 liters / 3.6 gallons	
Machine size	430 x 390 x 550 mm	16.9 x 15.35 x 21.7 inch
Use up to	2 print heads	Standard 0.35 mm brass nozzle. Optional 0.25, 0.5, 0.7 mm brass or hardened metal nozzle.
Extrusion speed	18 m³/s	
Motion speed	450 mm/s	
Layer height	minimum 50 µm	maximum 350 µm
Temperatures	Bed: up to 105°C	Nozzle: up to 275°C

Recommended materials: PLA, PETG, ABS-X,PVA

FELIX Pro 3

Fully upgradable professional  
desktop 3D printer

*Ergonomic and transparent cover for optimum view and access of the object.*

The FELIX Pro 3 is designed to make life easy for the user.

Every feature is there to enhance productivity and get the best 3D printing experience possible

#### Designed to perform

- **Professional desktop machine**, for prototyping and production.
- Designed for **ease-of-use**: intuitive and user friendly.
- **Industrial print quality**, ideal for office, school or research environment.

#### Benefits

- Professional hardware delivering unparalleled **return on investment**.
- **Eliminate downtime** with automated features.
- Industrial quality components ensure **maximum reliability**.
- **High quality object surface finish** and accuracy which minimizes post-processing.

#### What you'll love

- **Quiet operation** – at 34dBA, as soft as a whisper.
- **“Plug & Play”**. Easy to install, minutes until first print job.
- Enclosed or **open format** available.

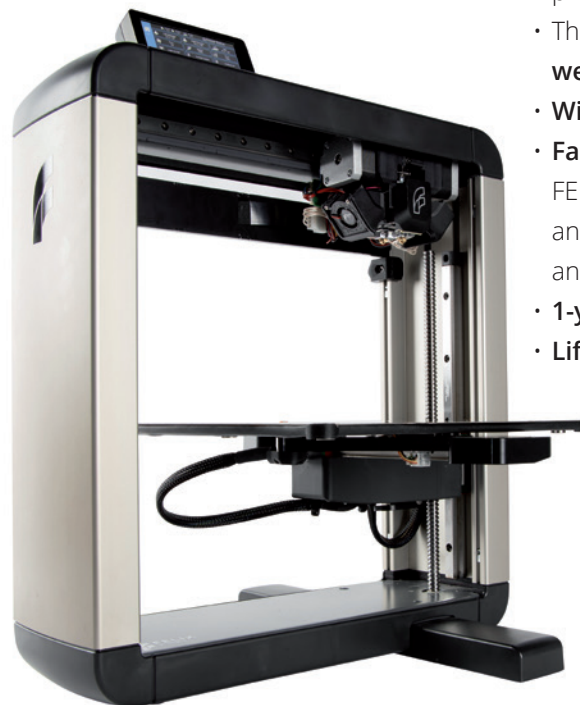

#### FUTURE-PROOF

- > **Upgrade quickly and easily to the latest technology.**  
Extend the life-cycle of the 3D printer without compromising on quality, reliability or productivity, eliminating the need to invest in an entirely new printer.

#### Did you know?

- Hand-made in Holland and **tested for 24 hours** against high CE standards
- **Filament flow detection system** pauses prints in case of a clogged nozzle or filament running out, preventing failed prints.
- The Pro 3 Touch includes **built-in webcam** for remote monitoring.
- **WiFi & LAN** connectivity enabled
- **Family-owned business** means FELIXprinters is personally involved and committed to your satisfaction and success.
- **1-year warranty**.
- **Lifetime customer support**.

#### Improved efficiency

- Ideal for **multi-user environment**, with print-server and print-file management.
- **Multiple machines** (print farm) **functionality**, individually operated or synchronized.
- **Intelligent software** – organizes all latest version print files in one location in an organized system.

#### Awards
